

The Graham Fulford Charitable Trust
in collaboration with Vista Health

Vista | HEALTH

The Graham Fulford Charitable Trust is working in collaboration with Vista Health, making it easier for you to access private prostate MRI scans at a reduced cost to get clear, detailed insights about your prostate health.

Available MRI scans, including a consultation and follow-up appointment with a Vista Health GP (originally £650 per scan*):

£275	Bi-parametric MRI (without contrast) A detailed initial scan without the need for contrast dye Discount code: GFCTBPMRI
£450	Multi-parametric MRI (with contrast) The most detailed scan, ideal where the clearest possible picture is needed Discount code: GFCTMPMRI

A GP referral is needed before your scan. Your Vista Health GP will arrange this after your consultation, and recommend the most suitable scan for you.

Why is an MRI important after a raised PSA?

- ✓ Provides a detailed, non-invasive view of your prostate
- ✓ Can reveal signs of prostate cancer, helping to determine whether further tests are needed
- ✓ Allows any suspicious areas to be located quickly and accurately

Your next steps:

1. Book your GP consultation. Call Vista Health on 0333 200 2064 (Mon–Fri 8am–8pm, Sat–Sun 8am–1pm). Mention you've come via The Graham Fulford Charitable Trust.

2. Attend your GP consultation. Share your PSA test results with the Vista Health GP, who will confirm the best scan for you and process your referral.

3. Book your scan. Vista Health will contact you to book your scan and follow-up appointment. Quote your scan discount code.

4. Your results. Your results will be ready within three working days, reviewed in your follow-up appointment, and won't be shared with GFCT or your NHS GP unless you request it.

If your MRI shows anything requiring further attention, this will be discussed in your follow-up appointment. GFCT can also arrange a free consultation with a private GP to help guide your next steps and support coordination with your NHS GP.
